

“Fantastic — really good sound. There’s not a bad seat in the house, sonically.”

– John Davidson, Paladin

SOUND SYSTEM SOLUTIONS

MEDIUM OUTDOOR SPORTS VENUE

Be a part of the team

An investment that lasts

Legendary performance and reliability from two of the most trusted names in sports venue sound – the proven choice of stadiums and arenas the world over. Designed to take a beating, survive the elements and work year after year, our solutions come with the added value of the industry’s best customer support.

Controlled coverage

Indoors or outdoors, keep the sound focused where you need it. Achieve sonic clarity and control in the most challenging acoustical environments – from gymnasiums and playing fields to large arenas.

Ease of use

Simple zone and level controls for installed audio systems help staff and volunteers stay focused on the game. Great sound quality with minimal effort.

Speech intelligibility

Hear all calls clearly and never miss a play. Turn up the music to get the crowd going. Whether on the concourse or in the main seating areas, our solutions precisely address the audio needs of any space – easily networked, remote-controlled and monitored via our robust electronics, software and DSP.

Complete system for any venue

Our extensive speaker portfolio includes ceiling, pendant, portable and surface-mount models, giving you background and foreground music options to suit every space and every budget – always with best-in-class sound quality and reliability.

MEDIUM OUTDOOR SPORTS VENUE

SYSTEM EXAMPLE FOR WEATHER-RESISTANT AUDIO

System overview

EVF loudspeakers mounted to the press box or other infrastructure near the home bleachers. EVH mounted similarly from the home stands but fired across the field to cover the visitor bleachers. EVF subwoofer provides additional low-end support for the larger crowds on the home side.

System benefits

EVF loudspeakers provide great full-range coverage, while EVH provides controlled coverage all the way across the field to ensure the visiting team and audience is not left out.

IPX multi-channel amplifiers offer the flexibility to operate on a 70 V / 100 V system for longer cable runs, or with lower impedance for shorter runs.

SONICUE sound system software offers quick and intuitive system set up, tuning and operation, and allows users to easily save and recall presets to ensure consistency – regardless of which staff members are on duty.

ELECTRO-VOICE | LOUDSPEAKERS

2x EVF-1152D-FG (fiberglass tops)

1x EVH-1152D-FG (fiberglass tops)

1x EVF-2151D-FG (fiberglass sub)

DYNACORD | AMPLIFIERS

1x IPX 10:8

If you need it, we've got it

The EV-Innovation family of loudspeakers is designed to specifically meet the diverse requirements of installed sports venue systems. EV-Innovation currently consists of five system formats: compact two-way (EVC), horn loaded (EVH), front loaded (EVF), line array (EVA) and ultra-compact (EVU).

Models from each series may be mixed and matched for consistent performance across any installation, providing system designers with complementary building blocks to address the needs of a wide range of venues and acoustical challenges.
