

**“It was clear that EV  
had new tools in place  
to help us build an  
outstanding sound  
system.”**

– Jonathan Laney, Consultant/System Designer

SOUND SYSTEM SOLUTIONS

## OUTDOOR AMPHITHEATER

**Every seat can be the best in the house**

### **High-performance audio, low-key looks**

Our installation-dedicated loudspeakers are acoustically and aesthetically matched, so whatever combination of products you select, your system looks as good as it sounds – blending into the architecture while filling the room with superior audio quality.

### **Flexible options to suit your space and budget**

We offer one of the industry's largest portfolios of product options, a range of choices to precisely address spaces of every size and shape with uncompromising performance – from ceiling speakers to line arrays.

### **Get your message across clearly**

Achieve a clean, natural-sounding mix for voices and music, with the highest intelligibility and even coverage across every seat.

### **Ease of use for trained staff or volunteers**

Production for services has changed a lot in 20 years, and your congregation's expectations are high. Our solutions achieve the ideal balance of sophisticated performance and simple operation, via intuitive software control interfaces such as SONICUE.

### **An investment that lasts**

Legendary performance and reliability from two of the most trusted names in performing arts sound. We offer proven product solutions with the added value of the industry's best customer support.

# OUTDOOR AMPHITHEATER

EXAMPLE FOR 6,000 – 10,000 FT<sup>2</sup> (1,800 – 3,000 M<sup>2</sup>)

## System overview

The X-Line Advance Install series offers exceptional sound quality, precision coverage and proven reliability in an elegant and easy-to-use package.

## System benefits

Visually compact system, but with a lot of output power.

Even coverage throughout the audience area.

Fully Dante-networked system allows IPX amplifiers to seamlessly operate with additional audio equipment.

SONICUE sound system software offers quick and intuitive system set-up, tuning and operation.

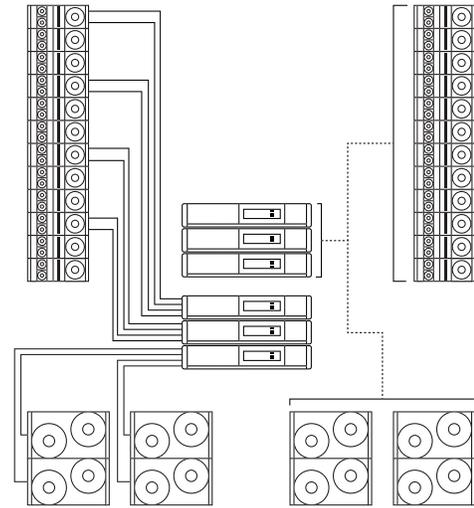

Easily save and recall presets to ensure consistency, regardless of which staff members are on duty.

## ELECTRO-VOICE | LOUDSPEAKERS

24x X2i-212 (mains)

8x X12i-128 (subs)

## DYNACORD | AMPLIFIERS

4x IPX 20:4 (mains)

2x IPX 20:4 (subs)

## If you need it, we've got it

The X-Line Advance Install series offers 20 different model options to suit the needs of any application. The X2i-212 and X1i-212 12" two-way line array elements are available with 90° and 120° horizontal coverage patterns, in black or white finishes.

All models incorporate superior EV-engineered transducers, crossovers and patented waveguide components.

Their lightweight and highly efficient two-way designs outperform many larger and heavier three-way systems, providing high SPL capability, extended HF response and linear LF output for more performance than previously possible from cabinets of this size.

The matching X12i-128 double 18" subwoofer is available for matching low-frequency support.
